How We Know Each Other

By Shomit Sirohi

Tick whatever it says

I. Chess Games

If you were brilliant at chess, or also normal at chess, or average, also fun at chess, wouldn’t it be Mozart.

II. What Chess Tells You

A comment – “Chess teaches you, how to be brilliant at all things. I meant the board is about moves, and thinking about moves, life is thoughtful and this is how it works. It also means we make moves on thoughtful people. We will always help thoughtful people, and it works when there is some chess in that context – that is a chess comment.”

- Vishwanathan Anand

III. The Quarterback

One leads the team. Judge if you can lead a team. It also means quit talking about leaders as not able to handle the vibe. A quarterback is aware that life’s goal is like sports news. He means he is a Quarterback.
